

## CAREER GUIDANCE VIDEOS

### **Title: Searching for Certainty**

Have you ever wondered how likely it is you will live to be 120? Would we ever expect a major hurricane to strike Ireland? Perhaps you are curious to know if 10,000 steps each day is enough to keep us fit and healthy? Are you unsure of what you would like to do when you finish school? We question things that are not clear to us, that are uncertain, that may or may not happen in our lifetime. Actuaries are trusted as experts in evaluating risk and financial uncertainty. This talk will introduce you to three actuaries who have taken maths beyond the classroom! Speakers will share insights into the skills and opportunities open to those who enjoy maths, and introduce you to the work of an actuary.

### **Title: Every Day Counts!**

The score at the game, phoning a friend, setting your alarm, tracking your steps, music, baking a cake...numbers are all around us! Most of us use maths a great deal more than we realise, *many* hours a day, *every* day a year. Join us as we explore real world maths, with real world examples from our hobbies, our jobs and our daily routine!
