Behaviour**

**New Products
/ New
Elements**

Focus on Embedded Insurance

New Products

Products that exist by leveraging tech

Parametric Insurance

Independent third-party sources to verify claim

B2B2C

Sell via a business partner site

Embedded Insurance Products

Weather Guarantee

Insurance for an unexpected weather event at a particular time and place

Real-time weather parameters are used to price and instantly assess claims.

Example: Heavy Rain at a Theme Park

Flight Delay

Insurance for an unexpected delay of your flight

Real-time flight data parameters are used to price and instantly assess claims.

Example: Ryanair Flight Delayed on departure or arrival

Screen Crack

Insurance for cracking the screen on your phone

AI driven app used to detect a crack on the phone screen

Example: Crack on your iPhone screen

Weather Focus – Pricing Process

Data

Data Gathered from API connection via R

Curate “Big Data”

Model Building

Build a model using acceptable statistical approaches.

Dynamic Pricing: Prices impacted by realtime information.

Dynamic Product: Different Product variations can be deployed

Generate Prices

Standard Claims Costs based on Expected Values

Add loadings based on commercial requirements

Monitoring

API Data used to analyse and assess model appropriateness

Anomaly Detection and AvE

Weather Guarantee Product(s) - Rain
