

Global ERM Webcast

Preparing for the Unexpected:
Enhancing the Actuarial Toolkit

This **5th global webcast** aims to shed light on developments and challenges faced by our counterparts in other parts of the world, covering both technical and professional aspects. The webcasts feature an update on the much talked about risk credential for actuaries, Chartered Enterprise Risk Analyst (CERA), and perspectives from modelers and reinsurers of mega events. Longevity is covered from different angles and Solvency II remains a key agenda item for the insurance industry.

Visit **SOA.org** to learn more.
