March 2016

Dear colleague,

In a few weeks time the 2nd European Congress of Actuaries will take place in Brussels from 21-22 April.

The programme has been set up to be as interactive as possible and covers the following themes : added value of actuaries outside the financial industry, development of the actuarial profession, ethics / independence of and for actuaries, consumer protection, behavioural finance and non-actuarial attitudes to risk, big data and modern technology / cyber risk and various scientific presentations.

In addition to several plenary sessions you will have a choice of 24 parallel sessions.

This unique European actuarial event, run every four years, will give you ample opportunities to learn new developments in fields of interest to various types of actuaries, and to network and exchange views with your European colleagues. For all information and to register: www.eca2016.org

This event will earn up to 11 CPD credits for actuaries for whom a CPD requirement is in place.

We look forward to welcoming you in Brussels.

Kind regards,

Philip Shier
Chairperson

Ad Kok
Chief Executive
