

IAA Life Section Colloquium 2016

25-27 April 2016

Hong Kong

Insurance Evolution: Change is the only Constant

The Actuarial Society of Hong Kong invites you to attend the Life Section Colloquium of the International Actuarial Association which will be held in Hong Kong from 25 to 27 April 2016. The overall theme of the conference, Insurance Evolution: Change is the only Constant, recognises that the life insurance industry is continuing to evolve to meet the needs of its customers, and how the role of the actuary is changing and adapting within this.

We are in an ever-changing time of the insurance industry. Waves of regulatory changes, heightened customer demand and dynamic economic environment have created significant opportunities. The programme will cover life insurance topics on regulations and capital, investments and risk/value management, life and health products, customers and distributions, analytics and others. It will include plenary sessions by invited keynote speakers, topical presentations by subject-matter experts, and parallel sessions at which submitted papers will be presented.

ABOUT IAA & ASHK

Founded in 1895, the IAA is the worldwide association representing professional actuarial bodies globally, with 67 full and 28 associate member organizations serving their members who are practising in the insurance and other fields. IAA exists to encourage the development of a global profession, acknowledged as technically competent and professionally reliable, and to ensure that the public interest is served.

ASHK is the actuarial professional body first formed in 1968 and is the membership organization for actuaries in the industries of insurance, consultancy, finance, education institutes and government. Many of its individual members are practising in insurance industry ranging from management, investment, risk to products, and many others.
